Headteacher Miss Lynn Black

November 2018

Dear Parent/Carer

Health Care Information

Beeslack High School is currently reviewing health care information we hold for our young people. To ensure we hold up to date accurate health information we would appreciate if you could complete and return the health questionnaire attached. This will ensure we can act accordingly should any medical emergencies arise. The questionnaire should be returned to the school office. If this form is not returned we will assume your child does not require any health support during the school day.

Asthma/Severe Allergy

Please be aware if your child has asthma or a severe allergy that requires an adrenaline pen, it has been advised by nurse specialists the best practice is to ensure your child carries an adrenaline pen / inhaler on their person. However a 2nd adrenaline pen/ inhaler should be kept in the school office should a medical emergency arise. Please ensure the 2nd adrenaline pen and/or inhaler is brought into school and clearly labelled.

If you would like to discuss this further, please contact me at the above details.

Kind regards,

A Donoughue
Depute Headteacher
