

Computing Science

Computing Science can be described as the science of the Digital World.

In S1 you will visit the department two periods a week.

- In **Computing Science** you will write small programs, explore what makes a computer work and develop computer games.
- In **Digital Literacy** you will enhance your digital skills that you will be able to use across the school and beyond.

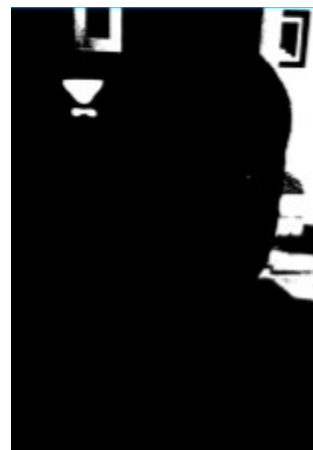

My name is Mr McGinley and I am Principal Teacher of the Technologies Faculty. I teach Computing Science.

Meet the Team!

Mr Neil

Mr Rankin

Transition Lesson

We use technology to communicate every single day of your lives. How would you feel if anybody could look at the message that you share with your friends.

In our transition lesson you will examine **Encryption** and utilise some decryption strategies to solve a crime.

To start our lesson scan the QR code opposite with a SmartPhone camera or enter tiny.cc/p7Computing into the address bar of a web browser.

Good Luck! Let us know if you solve the crime.
